

## STAKEHOLDER INTERVIEWS

1. What inspired the idea for this book exchange app, and what problem do you hope it solves?
2. How do you see the app differentiating itself from existing book exchange platforms?
3. What role do you see yourself playing in the design and development process?
4. What are your expectations for the app's user base and growth?
5. How do you envision users interacting with the app daily?
6. What key features do you believe are essential for the app's success?
7. What type of notifications or updates would you like users to receive?
8. How can we ensure a smooth and intuitive user experience?
9. Are there any specific design aesthetics or user experience elements you have in mind?
10. What security measures should be implemented to protect users and their data?
11. What is your preferred method for book exchange—direct swaps, lending, or a points-based system?
12. How far do you think users would be willing to travel for an in-person exchange?
13. Would you be open to integrating a book delivery option?
14. What challenges do you foresee in the logistics of exchanging books?
15. How do you plan to measure the app's success and user satisfaction?
16. What monetization strategies do you think would work best (ads, subscriptions, delivery fees, etc.)?
17. What partnerships (with libraries, bookstores, or delivery services) could enhance the platform?
18. Are there any technical or resource constraints we should be aware of?
19. What risks or challenges do you foresee in scaling the platform?
20. What concerns do you have regarding security, privacy, or logistics?
21. Are there any policies or regulations that could affect book exchanges?
22. What would make you personally excited to use this app?
23. Is there anything else you'd like to share about your vision for this project?
